NSF Current and Pending (Other) Support

Content worksheet for SciENcv

Brian Mark Anderson, PhD, DABR | Clinical Assistant Professor of Medical Physics, University of California, San Diego | eRA Commons: BrianMAnderson | ORCID 0000-0002-2748-1444

Prepared 10/27/2026. DRAFT for Brian's review: nothing here is final until he confirms it.

How to use this worksheet

NSF requires every senior/key person's Current and Pending (Other) Support to be prepared in SciENcv, which produces the only NSF-compliant PDF (PAPPG 24-1, Chapter II.D.2.h(ii)). **This worksheet is the content, not the form.** Each block below mirrors one SciENcv entry, field by field, so the values can be pasted in order. The right-hand column of every table says where a value came from; **[CONFIRM]** marks anything that could not be verified from a public source and must come from Brian or a sponsored-projects office before it is entered. The companion README.md lists the exact questions to ask the UNC and UCSD offices and where each answer goes.

Rules that shape every entry (PAPPG 24-1 II.D.2.h(ii); NSF SciENcv FAQ):

- **Current** = any active project or project with ongoing obligations, from any source (federal, state, foreign, foundation, industry, or internal institutional funds). **Pending** = any proposal under consideration, including this NSF proposal itself.
- Only projects Brian commits time to are listed. **SciENcv rejects a person-months value of 0** (FAQ Q23): if his effort on a project is now zero, the project is removed, not zero-filled. Enter the real figure, including unsalaried effort; estimates are acceptable (minimum 0.01).
- **Total award amount** is the whole-dollar total for the full award period including indirect costs. Dates are MM/YYYY. **Overall objectives** is limited to 1,500 characters. **Overlap statement**: write "None" when there is no overlap in scope, budget, or person-months.
- **No personal information** (home address, personal phone/e-mail) goes in the form.
- **Certification cannot be delegated:** Brian ticks the certification in his own SciENcv account before the PDF can be downloaded. The downloaded PDF must be submitted as-is (renaming is fine; opening and re-saving in another application is not).

SciENcv Section 1 - Identifying information, organization and location

SciENcv field	Value to enter	Source / status
Name	Brian Mark Anderson	CV header.
Position title	Clinical Assistant Professor of Medical Physics	CV header. The NIH biosketch says "Department of Radiation Oncology"; the CV says "Radiation Medicine & Applied Sciences". Use the department name on the UCSD appointment letter **[CONFIRM]**.
Organization	University of California, San Diego - Department of Radiation Medicine and Applied	CV. **[CONFIRM department wording with**

SciENcv field	Value to enter	Source / status
	Sciences	**UCSD]**
City / State / Country	La Jolla, CA, USA	The UCSD campus mailing address is La Jolla (9500 Gilman Drive); the CV header says San Diego. Match whatever the proposal cover sheet uses for the performance site **[CONFIRM]**.
Sign-in identifiers (not entered in the form)	eRA Commons BrianMAnderson; ORCID 0000-0002-2748-1444	CLAUDE.md. Either route lands in the same NCBI account once linked.

SciENcv Section 2 - Projects and proposals

Entry A - CURRENT: AHRQ R18 HS029474 (UNC Chapel Hill; Mazur / Marks)

What the public record shows. The CV and NIH biosketch list this as a 2024 "R-01, Co-Investigator" under "AHRQ Health Services Research Projects: Examining the Impact of Artificial Intelligence on Healthcare Safety". NIH RePORTER and AHRQ's own project listing show the Mazur/Marks award is an **R18** (Research Demonstration and Dissemination Project), number **R18 HS029474**, awarded 03/28/2024 under PA-21-267 "Making Health Care Safer in Ambulatory Care Settings and Long-term Care Facilities (R18)". "Examining the Impact of Artificial Intelligence (AI) on Healthcare Safety" is the title of a different AHRQ announcement (PA-24-261, also R18). RePORTER lists only the PIs, so Brian's Co-Investigator role and effort cannot be verified publicly; they must come from the UNC Office of Sponsored Programs.

SciENcv field	Value to enter	Source / status
Status	Current	**[CONFIRM]** Keep only if Brian still commits person-months after his 07/2025 move to UCSD (UNC adjunct appointment 2025-present). If his effort is now 0, omit the entry (FAQ Q23).
Title	Development and Assessment of Artificial Intelligence (AI)-Enhanced Pre-treatment Peer-review Process to Improve Patient Safety in Radiation Oncology	NIH RePORTER project title (appl. 10839671). AHRQ's listing spells "Pretreatment" as one word; either is acceptable.
Award number	R18HS029474 (original award 1R18HS029474-01A1; current budget year 5R18HS029474-02)	NIH RePORTER. Not an R01: the CV and NIH biosketch need correcting (separate follow-up). **[CONFIRM with UNC**

SciENcv field	Value to enter	Source / status
		OSP that no separate R01 lists Brian as Co-I]
Source of support	Agency for Healthcare Research and Quality (AHRQ), U.S. Department of Health and Human Services. Prime awardee: University of North Carolina at Chapel Hill (contact PI Lukasz Mazur, PhD; MPI Lawrence B. Marks, MD).	NIH RePORTER; AHRQ project page. **[CONFIRM]** If Brian's post-2025 effort runs through a UNC-to-UCSD subaward, write "AHRQ (prime: University of North Carolina at Chapel Hill; subaward to UC San Diego)".
Primary place of performance	Chapel Hill, NC, USA	RePORTER organization record. **[CONFIRM]** If Brian's work is performed at UCSD under a subaward, enter La Jolla, CA, USA instead.
Start date	04/2024	RePORTER and AHRQ: project period 04/01/2024 - 03/31/2027.
End date	03/2027	Same. **[CONFIRM]** whether a no-cost extension is planned; if so use the extended end date.
Total anticipated amount (incl. indirect costs)	$1,345,650	AHRQ project page total. RePORTER by budget year: Y1 (04/2024-03/2025) $450,000 = $307,898 direct + $142,102 indirect; Y2 (04/2025-03/2026) $450,000 = $312,529 + $137,471; Y3 not yet posted. UNC's announcement rounds to "$1.3 million". **[CONFIRM]** If a subaward exists, the sponsored-projects office may instruct entering the subaward total to UCSD instead; follow their instruction.
Person-months per budget year (current period first)	Budget year 3 (04/2026 - 03/2027): **[CONFIRM x.xx calendar months]** Add a row for 04/2027 - 03/2028 only if a no-cost extension is granted. Prior years (Y1 04/2024-03/2025, Y2 04/2025-03/2026) are not entered; SciENcv asks for the current and each subsequent period.	From UNC OSP / the award budget. Enter calendar months, including unsalaried effort. SciENcv rejects 0 (FAQ Q23); minimum 0.01. For an April-March budget year

SciENcv field	Value to enter	Source / status
		SciENcv's "Year" field takes the later calendar year (FAQ Q24), i.e. 2027 for the current period.
Overall objectives (max 1,500 characters)	Develop, integrate, and evaluate an artificial intelligence/machine learning (AI/ML) intervention for pre-treatment peer review in radiation therapy (RT). Aim 1: develop AI/ML algorithms and visual summaries that characterize provider variability in key treatment-planning steps (e.g., target-volume definition and prescribed dose) and flag potential errors for reviewers, refined through user-centered design cycles. Aim 2: implement the integrated intervention in the clinical environment and evaluate its impact on patient safety with a cluster-randomized stepped-wedge design (ClinicalTrials.gov NCT07463833), quantifying safety as the rate per 1,000 RT fractions of clinically relevant errors missed at pre-treatment peer review and caught by downstream QA. Dr. Anderson's role: **[CONFIRM - e.g., co-investigator leading development of the AI strategies and software for plan-quality and safety review, including tools suited to low-resource and rural settings]**.	Drafted from the RePORTER project abstract and the AHRQ project summary; 966 characters including the role placeholder. Replace the bracketed role sentence with Brian's actual responsibilities as stated in the award **[CONFIRM]**.
Statement of potential overlap	None	**[CONFIRM]** once the NSF aims are final. If the NSF proposal also develops AI tools for radiotherapy plan-quality or safety review, replace with one sentence that distinguishes the two scopes and states that the budgets and person-months do not overlap.

Public sources for Entry A

- NIH RePORTER, FY2024 record 1R18HS029474-01A1 (title, dates, PIs, abstract, costs): https://reporter.nih.gov/project-details/10839671
- NIH RePORTER, FY2025 record 5R18HS029474-02 (budget period 04/2025-03/2026): https://reporter.nih.gov/project-details/11062383
- AHRQ Digital Healthcare Research project listing (total $1,345,650; period 04/01/2024-03/31/2027): https://digital.ahrq.gov/ahrq-funded-projects/development-and-assessment-artificial-intelligence-ai-enhanced-pretreatment

- UNC School of Medicine announcement, 04/2024 ("$1.3 million", three-year project): https://www.med.unc.edu/intranet/2024/04/mazur-and-marks-receive-1-3-million-to-develop-ai-algorithms-to-enhance-patient-safety/
- Funding opportunity the award was made under, PA-21-267 (R18; caps of $450,000/year and $1.35 M total, 3 years): https://grants.nih.gov/grants/guide/pa-files/PA-21-267.html
- The announcement whose title the CV uses, PA-24-261 "Examining the Impact of AI on Healthcare Safety (R18)" (a different NOFO): https://grants.nih.gov/grants/guide/pa-files/PA-24-261.html
- ClinicalTrials.gov NCT07463833, the Aim 2 stepped-wedge trial (sponsor UNC Lineberger; started 06/2026): https://clinicaltrials.gov/study/NCT07463833
- HSRProj could not be searched: NLM retired it on 09/14/2021: https://www.nlm.nih.gov/pubs/techbull/mj21/mj21_nichsr.html
- Not findable publicly: Brian's named role, his budgeted effort, and any subaward. RePORTER lists PIs only; the AHRQ page and ClinicalTrials.gov name no other team members.

Possible additional Pending entries from the same group [CONFIRM]

The CV entry also lists "Systems-Based Approaches to Improve Patient Safety" and "Efficacy of AI assisted sim review in rural settings: randomized control study". The first reads like an AHRQ announcement title rather than a project; the second like a distinct study. If any proposal from the Mazur/Marks group that names Brian as senior/key personnel is still under review (for example a submission to PA-24-261), it must be entered as a separate **Pending** block with the same fields: title, proposal number if assigned, source, place, requested dates, requested total including indirects, person-months per year, objectives, and overlap. Ask UNC OSP (README, question 6).

Entry B - PENDING: this NSF proposal

PAPPG 24-1 defines Pending as any proposal under consideration, **including the proposal being submitted**. Every value below comes from the proposal's cover sheet and budget; none is in the CV.

SciENcv field	Value to enter	Source / status
Status	Pending	Required for the proposal itself.
Title	**[CONFIRM - exact proposal title as entered on the Research.gov cover sheet]**	Proposal cover sheet.
Proposal number	Leave blank (not yet assigned)	NSF assigns the number at submission. If the proposal has already been submitted and NSF has issued a number, enter it **[CONFIRM]**.
Source of support	National Science Foundation **[CONFIRM directorate / division / program solicitation]**	Cover sheet.
Primary place of performance	La Jolla, CA, USA **[CONFIRM]**	Cover sheet "Primary Place of Performance". Use the same city as Section 1.
Start date	**[CONFIRM MM/YYYY - requested start]**	Cover sheet.
End date	**[CONFIRM MM/YYYY - requested end]**	Cover sheet.
Total anticipated	$**[CONFIRM - total requested, line L of the**	Budget justification /

SciENcv field	Value to enter	Source / status
amount (incl. indirect costs)	**budget]**	Research.gov budget. Whole dollars, including F&A for the full requested period.
Person-months per budget year	Year 1 (**[CONFIRM MM/YYYY-MM/YYYY]**): [x.xx] Year 2: [x.xx] Year 3: [x.xx] (add or remove years to match the requested period)	Budget pages (calendar, academic, or summer months as budgeted). Include committed unsalaried effort. SciENcv "Year" = later calendar year of each budget period (FAQ Q24).
Overall objectives (max 1,500 characters)	**[CONFIRM - paste the proposal's overview/objectives, trimmed to 1,500 characters]**	Project Summary (Overview) is the usual source.
Statement of potential overlap	None	If the NSF work builds on the AHRQ project, say so explicitly and state that the scope, budget, and person-months do not overlap **[CONFIRM]**.

Other sources of support to rule in or out [CONFIRM]

Each item below is reportable only if it is active or pending, supports Brian's research, and carries a time commitment. The CV suggests none applies, but only Brian can confirm.

Candidate	What the rule says	Worksheet action
UCSD internal funds (departmental seed or pilot grants, internal awards)	Internal institutional funding counts as a source of support when it funds research with an effort commitment.	If any exist, add a Current block with the same fields; source = "University of California, San Diego (internal)".
UCSD startup package	Startup packages from the proposing organization are NOT reported (NSF disclosure table).	Nothing to enter.
UNC startup package (2023-2025 appointment)	Startup packages from an organization other than the proposer ARE reported if still active.	Not current after the 2025 departure unless funds remain accessible **[CONFIRM]**; if so, add a Current block.
Industry research agreements, vendor-sponsored projects (Varian, Elekta, RaySearch, etc.)	Reportable when they fund research and involve Brian's time; equipment or data loans fall under in-kind below.	None in the CV. Add a block if any exist.
Other pending proposals (any sponsor, including	Every proposal under consideration on which Brian is senior/key personnel is	Add a Pending block per proposal.

Candidate	What the rule says	Worksheet action
NIH/AHRQ or foundation submissions)	Pending.	

SciENcv Section 3 - In-kind contributions

Rule (PAPPG 24-1 II.D.2.h(ii)). Report non-cash contributions from an entity outside UCSD that directly support Brian's research, require a commitment of his time, and have an estimated value of **$5,000 or more** (examples: laboratory or office space, equipment, data or datasets, supplies, goods and services, employee or student resources). Contributions under $5,000, or with no associated time commitment, are not reported. In-kind resources intended for use on this NSF project go in the proposal's Facilities, Equipment and Other Resources section instead, not here.

SciENcv field	What goes there	Note
Status	Current or Pending	Per contribution.
Receipt date (or anticipated)	MM/YYYY	
Source	Name of the entity providing the contribution	
Summary of the contribution	What was provided	
Person-months per year	Calendar months of Brian's time the contribution requires, current period first	Minimum 0.01.
U.S. dollar value	Estimated value, whole dollars	Must be $5,000 or more to be reportable.
Overall objectives (max 1,500 characters)	What the contribution supports	
Statement of potential overlap	"None" if none	

Determination for this worksheet: NONE IDENTIFIED. Nothing in the CV describes an external contribution of space, equipment, data, or personnel that requires Brian's time. Items considered and ruled out: UCSD departmental resources (from the proposing organization, not reported); the UNC adjunct appointment (an appointment, not a resource - see the next section); AAPM committee and journal roles (unpaid service, no resources); open-source software collaborations such as DicomRTTool and the Keras contribution (no external resources received). **[CONFIRM]** that no collaborator supplies datasets, compute, equipment, or staff for Brian's research at or above $5,000 - the UNC AHRQ team's data access is part of the funded award, not a separate in-kind contribution, unless UNC provides it outside the award.

Appointments are not support (biosketch items, not entries here)

The NSF disclosure table places academic, professional, or institutional appointments - paid or unpaid - in the **Biographical Sketch**, not in Current and Pending Support. Current and Pending Support lists resources (funding, in-kind, consulting), so the following roles from the CV stay out of this document

unless they carry salary or research resources from a source outside UCSD, in which case that funding becomes an entry:

- UCSD: Chair of Technical Innovation and Implementation (2025 - present); Technical Service Chief, Central Nervous System (2025 - present); Search Committee Member (2026 - 2027). Departmental roles within the proposing organization: biosketch only.
- UNC Chapel Hill: Adjunct Assistant Professor (2025 - present). Unpaid adjunct appointment: biosketch only. [CONFIRM] it carries no salary; if UNC pays Brian for AHRQ effort through this appointment, that is the Entry A effort, not a separate entry.
- AAPM: Task Group 263, Machine Intelligence Subcommittee, QUANTEC 2 Working Group, Medical Physics Board of Associate Editors; Medical Physics journal Associate Editor (2023 - present). Unpaid service: biosketch only. [CONFIRM] no honorarium tied to research effort.

Consulting

Rule (PAPPG 24-1 II.D.2.h(ii); NSF disclosure table). Consulting is entered in the projects and active projects section when it (1) requires Brian to perform research, (2) does not involve research but is related to his research portfolio and could affect his funding, effort, or scientific integrity, or (3) is under a contract requiring him to conceal or withhold confidential financial ties, regardless of its duration. **The dollar amount Brian receives goes in the total-award-amount field**, with the company as the source, the contract dates, person-months, a one-line objectives statement, and an overlap statement.

Determination for this worksheet: NONE IDENTIFIED in the CV. [CONFIRM] that Brian holds no paid consulting, advisory-board, or expert-witness engagement (including with radiotherapy vendors or AI companies) that meets any of the three tests. Purely clinical or teaching consulting unrelated to his research portfolio is not reported.

Closed awards - not reportable

"Current" means active or with ongoing obligations. The following CV items are closed and are not entered anywhere in the form:

Award (CV)	Period and amount	Why not reported
Society of Interventional Radiology (SIR) Allied Scientist Grant	2019 - 2021 (two years); $40,000 total	Ended ~2021. **[CONFIRM]** no open final-report obligation.
MD Anderson Dr. John J. Kopchick Fellowship	2020, 2021; $15,000 per year	Closed with the PhD (2021).
AAPM Summer Undergraduate Fellowship	2014; 10-week program	Closed.
Georgia Tech President's Undergraduate Research Award (PURA)	2013, 2014	Closed.

What Brian must supply before anything is entered

Item	Who has it	Goes in

Item	Who has it	Goes in
Whether he is still Co-I on R18 HS029474 with non-zero effort after the 2025 move; whether a UNC-to-UCSD subaward exists	UNC Office of Sponsored Programs (OSP) / the Mazur-Marks research administrator; UCSD HS SPPO if a subaward	Entry A: Status, Source of support, Place of performance
Person-months for budget year 3 (04/2026 - 03/2027) and any extension year	UNC OSP / award budget	Entry A: Person-months
Confirmation of the total award ($1,345,650) or the subaward total to UCSD, and the budget-period dates	UNC OSP	Entry A: Total amount, Start/End
Brian's stated responsibilities on the award	Award budget justification / Dr. Mazur	Entry A: Objectives (role sentence)
Any pending proposals from the UNC group or elsewhere naming him as senior/key personnel	UNC OSP; Brian	Additional Pending blocks
NSF proposal title, requested dates, total requested including F&A, person-months per year, program	UCSD Office of Contract and Grant Administration (OCGA) / department fund manager; the proposal budget	Entry B: all fields
Department name and performance-site city as the cover sheet states them	UCSD OCGA / fund manager	Section 1; Entry B: Place of performance
Any UCSD internal funding, industry agreements, consulting, or in-kind contributions	Brian	New blocks as applicable; Consulting; In-kind
Overlap wording once the NSF aims are final	Brian	Entries A and B: Overlap statement
